

Academic Results 2023

Thanks to the hard work and dedication of our students and staff, Queen Elizabeth's success continued in 2023. The outstanding headline figures below, along with those from previous years can be explored further at <https://www.compare-school-performance.service.gov.uk/school/136315/queen-elizabeth's-grammar-alford---a-selective-academy>

GCSE

Progress 8: A value-added measure based on the students' performance across 8 subjects including English and mathematics, 3 further subjects from the EBacc suite of qualifications (at least two sciences including computer science, geography, history and a modern foreign language) and 3 other approved subjects. It takes into account pupils' starting points (their Key Stage 2 results) and shows how much progress they made relative to pupils with a similar starting point nationally. It provides a level playing field when comparing schools with intakes of different abilities; a score of zero would indicate that the pupils made the same amount of progress as the national average.

Progress 8 score

The academic progress that pupils make from the end of key stage 2 to the end of key stage 4. This is based on 8 qualifications.

The banding for this school or college is 'above average' because the score is greater than 0 but lower than 0.5, and the entire confidence interval is above 0.

Banding	ABOVE AVERAGE
Score	0.36
Confidence interval 	0.04 to 0.69

[More information about this score](#)

Pupils here achieve up to half a grade higher in each qualification on average, compared to similar pupils across the country.

Attainment 8: based on the same suite of 8 qualifications as Progress 8, this measure shows the raw attainment of pupils; it does not take into account their prior attainment at Key Stage 2.

English Baccalaureate (EBacc) Entry: this shows the percentage of pupils entered for the full suite of EBacc subjects listed above. The government introduced this measure to encourage schools to enter pupils for a suite of academically rigorous, highly respected qualifications and to overcome the distortion of Performance Tables caused by centres entering pupils for large numbers of extremely accessible yet high-scoring qualifications.

Reaching threshold grades in English and mathematics GCSEs: 95% of QEGS pupils achieved grade 4 or above in these two core subjects (the equivalent of the old 'A*-C' measure). Grade 5 is equivalent to a high grade C or low grade B in the old grading system. The new headline figure is therefore slightly more demanding than the previous 'A*-C' measure.

Grade 5 or above in English & maths GCSEs

This tells you the percentage of pupils who achieved grade 5 or above in English and maths GCSEs.

Staying in Education or entering employment after Key Stage 4: this relates to those who completed Key Stage 4 in 2021, which are the most recent data available.

Key Stage 5

	Average result	Points
School / college	B-	36.04
Lincolnshire state-funded schools / colleges	C+	34.57
England all schools/colleges	B-	35.29

Progress: a value-added measure showing how much progress students made between the end of Key Stage 4 and the end of Sixth Form, relative to students with similar starting points nationally. Of course our outstanding value-added at Key Stage 4 makes it very difficult to show such high levels of progress again here (it's rather like slicing a pie: as one slice gets bigger, the other gets smaller). Our KS5 progress scores over the previous 5 years have therefore been in the 'average' or 'above average' categories.

Due to the cancellation of GCSE examinations in 2021 because of COVID, however, progress data could not be published for A-levels in 2023.

Retention: 91.8% of students completed their course of post-16 study

Destinations: students at the end of Key Stage 5 staying in education or going into employment or an apprenticeship from October to March the following year.

Students progressing to higher education or training [?](#)

Total number of students: 56
