

## Keeping Safe Survey

For the last few years, we have gathered children and young people's views around their online habits and issues they may experience, such as online bullying and exposure to harmful content through our Keeping Safe Survey. We use this information to track apps our children are using and to support further education for parents and professionals around how to support our children to have safer digital experiences.

This year's survey has now been released. Please encourage your child to complete the survey. The survey is anonymous and no personal information is collected that could identify your child.

They can complete using a tablet or phone using the QR code or link below:
